GitHub: github.com/PlatonicM
Website: <https://client-rust-psi-90.vercel.app/>

SKILLS

Languages

Python, TypeScript

Frontend

React, Next.js, Node.js, Tailwind CSS, Vite, ShadCN UI, Framer Motion, TailwindCSS

Backend

Django, Django REST Framework, FastAPI, REST APIs, JWT Authentication, RBAC, API Integration

Database

PostgreSQL, MongoDB, Redis

Tools & Cloud

AWS S3, Docker, Celery, Jira, Git, GitHub, Postman

AI Tools

AI/LLM, RAG, AI Agents, OCR, ML, Prompt Engineering, Semantic Search, ChatGPT, Claude

EDUCATION

Bachelor of Computer Application - BCA

Jun 2019 - Jul 2022

Perna college of commerce, - RTMNU · Nagpur, MH

CERTIFICATIONS

Python Programming

ThinkNEXT Technologies Pvt. Ltd.

Issued Jan 2022 · ID: 856960

[View Certificate](#)

SUMMARY

Software developer with 2+ years building reliable, scalable web applications across the stack - from front-ends React, TypeScript, NodeJs and from back-ends Python, Django, Django REST Framework, FastAPI services. track record of shipping features that move product metrics and mentoring teammates along the way.

EXPERIENCE

Software Engineer - Aug 2024 - Sept 2026

Insightful Mentoring Network Pvt. Ltd. · Faridabad, Haryana · Remote

- Designed and implemented secure REST APIs supporting multiple business domains, including EdTech, Social Networking, AI Automation, and SaaS platforms using Python-based backend technologies.
- Contributed across application architecture, backend development, deployment, optimization, and production support for enterprise-grade applications.
- Developed modular application architecture using service, repository, and storage-adapter layers, enabling integration with APIs, databases, object storage, vector databases, and LLM services.
- Built reusable backend modules and service components to improve maintainability, reduce duplicated implementation, and support feature development across multiple projects.
- Designed and optimized PostgreSQL schemas, indexes, and database queries to improve application performance and support scalable data access.
- Integrated AWS S3 for media and document storage, supporting high-volume asset uploads and efficient retrieval workflows.
- Implemented JWT authentication and Role-Based Access Control (RBAC) to secure APIs and enforce role-based access to application resources.

PROJECTS

■ ExamForge-AI - AI-Powered Exam Preparation Platform | [GitHub](#)

May 2026 - Aug 2026

Technologies: Next.js, React, TypeScript, Tailwind CSS, Framer Motion, React Hook Form, Zod, TanStack Query, AI/LLM, OCR, FastAPI

- Developed responsive frontend workflows for goal management, document library, notes, flashcards, planner, mock tests, and progress tracking.
- Built reusable React/Next.js components and integrated frontend workflows with backend APIs.
- Implemented form validation and client-side state handling using React Hook Form, Zod and TanStack Query.
- Integrated document-upload workflows supporting educational content and coordinated API contracts with the FastAPI/backend team.
- Implemented loading, validation, success and error states to provide reliable user workflows.
- Collaborated with backend, AI and DevOps teams to deliver end-to-end features.

■ Mentor - Learning Management System | [GitHub](#)

Sept 2024 - Mar 2025

Tech: FastAPI, React, TypeScript, Tailwind CSS, AI/LLM, RAG, Autonomous Agents, MongoDB

- Integrated LLM and RAG capabilities to power automated tutoring agents, intelligent query answering, and dynamic course recommendations.
- Structured high-performance MongoDB data pipelines and FastAPI endpoints for real-time quiz evaluations and analytics tracking.
- Focused on production-ready frontend practices including component reusability, maintainability, responsive design.
- Implemented clean, responsive interfaces optimized for clarity, usability, and fast performance across learning workflows.
