

# MRUNAL CHAUDHARI

## SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Location: Nagpur, MH | Phone: +91 7030087366 | Email: mrunalchaudhari666@gmail.com  
LinkedIn: linkedin.com/in/mrunal-chaudhari03 | GitHub: github.com/PlatonicM

### SUMMARY

Software developer with 2+ years building reliable, scalable web applications across the stack — from front-ends (React, TypeScript, Next.js, Tailwind CSS) to back-ends (Python, FastAPI, Django REST Framework, Node.js microservices). Proven track record of shipping production features, architecting multi-agent AI systems, RAG document intelligence, and optimizing REST APIs.

### TECHNICAL SKILLS

|                           |                                                                                    |
|---------------------------|------------------------------------------------------------------------------------|
| <b>Languages:</b>         | Python, TypeScript, JavaScript, SQL                                                |
| <b>Frontend:</b>          | React, Next.js, Tailwind CSS, Vite, ShadCN UI, Framer Motion, TanStack Query       |
| <b>Backend:</b>           | FastAPI, Python, Django, Node.js, Express, REST APIs, JWT Auth, RBAC               |
| <b>Database:</b>          | PostgreSQL, MongoDB, Redis                                                         |
| <b>Tools &amp; Cloud:</b> | AWS S3, Docker, Celery, Git, GitHub, Postman, Linux                                |
| <b>AI &amp; Agentic:</b>  | AI/LLM, RAG, Autonomous AI Agents, OCR, Vector DBs, Prompt Engineering, Gemini API |

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                               |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>Software Engineer — Insightful Mentoring Network Pvt. Ltd.</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Aug 2024 – Sept 2026   Remote |
| <ul style="list-style-type: none"><li>Designed and implemented secure REST APIs supporting EdTech, AI Automation, and SaaS platforms using Python &amp; FastAPI.</li><li>Developed modular service-repository architecture integrating PostgreSQL, MongoDB, Redis, AWS S3, and LLM services.</li><li>Built reusable backend service components improving maintainability and reducing duplicate implementations across projects.</li><li>Designed and optimized PostgreSQL schemas, composite indexes, and queries to reduce endpoint latency.</li><li>Integrated AWS S3 for secure document and media storage with pre-signed upload workflows.</li><li>Implemented JWT authentication and Role-Based Access Control (RBAC) to enforce fine-grained authorization.</li></ul> |                               |

### FEATURED PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Aptora — AI-Powered Exam Preparation Platform   <a href="#">GitHub Repository</a></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | May 2026 – Aug 2026 |
| <i>Technologies: Next.js 14, React, TypeScript, Tailwind CSS, Framer Motion, React Hook Form, Zod, TanStack Query, FastAPI, RAG, OCR</i> <ul style="list-style-type: none"><li>Developed responsive frontend workflows for goal management, document library, flashcards, adaptive mock tests, and analytics.</li><li>Integrated OCR document ingestion and RAG search pipelines converting textbooks and PDFs into structured study decks.</li><li>Implemented strict type-safe schema validation with Zod and optimistic state handling via TanStack Query.</li></ul> |                     |
